AND METHOD

PROPOSED AGENDA

Applicants respectfully propose the following agenda for the personal interview to be conducted on December 15, 2005 at 1:30 p.m. regarding the above-captioned application:

1) Applicants would like clarification from the examiner as to basis for rejection of claim 13. (This point is related to point 2 below; what I am hoping is this claim will help highlight the differences between a content list and a database for the examiner).

2) Applicants would like to discuss differences between the "content list" of the invention and the database discussed in the Buist '282 patent. In particular, we would like to draw the examiner's attention to the description of the "content list" in the specification at page 3, lines 15-22 and in Figures 5, 6a and 6b of the application.

3) Applicants would also like to discuss the differences between feed and field stations discussed in the application, which direct content to end users, and the Buist system, in which content is requested by the end users. See, e.g., the description at page 72, lines 8-22 in the application and the flowchart of Fig. 33 of Buist at steps 3310 and 3315.

Respectfully submitted,

DLA PIPER RUDNICK GRAY CARY US LLP

A handwritten signature in black ink, appearing to read "James M. Heintz", is written over a horizontal line.
